It's still missing some features, but it has a working renaming function, so you can call it something else (e.g. "App New Version" in the title). As of version 2.0, files are saved as

'converted' instead of 'orig' and renamed accordingly. If you wish to save the file as "orig", copy it and rename it back to "orig". I would highly suggest making a donation to this project. It's a very nice project and has been around for a long time with no income. Introducing the App Store. Now featuring IMDb integration! The Fluffy App now allows you to download any movie or TV show available on the App Store (any episode or movie, new or old). You can also watch all movie trailers available on the App Store. The most popular photograph sharing app on the market, Facebook is the biggest name in social media and image editing. If you're like us, you've probably spent hours at times trying to find a way to get more out of your images, and are constantly coming back to this app with the same, unfulfilled wishes. However, thanks to the brand new features in v2.5, Facebook can now do even more than ever before. Among them are: – Improved image processing. Facebook just got smarter, and so will your photos – A slicker interface – Faster, and way more intuitive We'll break down what's new for you here, and you can see for yourself in the video, available above. Starting with the app itself, the user interface has seen a drastic makeover, and the new version has a cleaner, and more cohesive look. The layout makes the app much more responsive, and allows for faster access to core functions. The new application also includes a ton of new features, allowing users to not only improve their images, but also share them with the world. This includes the new Community Photo feature, which allows users to add other Facebook members to a special album for collaboration. The new face filter is a fun new option, allowing you to mask faces from your images, as well as change skin tones and eye colors. The team has also done a solid job when it comes to enhancing photo editing. The new "Auto Fix" option helps remove unwanted objects from photos, while the new "Graphic Elements" section allows you to adjust lighting and contrast. All of this is made possible through the new AI (artificial intelligence) engine, the "Aural Infusion". This new AI upgrade adds a host of new features, including, but not limited to: – In-built recognition of people in images – More advanced image editing – Advanced image editing – Intelligent red-eye reduction – Exposure and brightness adjustments – HD quality images – Red-eye reduction – Image cropping – Stabilization We believe this brand new upgrade is a great step in the right direction. This means that users can do even more than ever, and if you're currently the recipient of "bad photos", don't despair, as the
