Red Eye Remover Crack +

Free Softonic Windows Installer Download. About Red Eye Remover Red Eye Remover is a powerful program which enables you to remove

red eyes effect from your image files. The tool supports the JPG, BMP, PNG, GIF and TIFF formats. It offers a standard, easy-to-use interface in which you can open pictures by using either the file browser or the "drag and drop" method. So, you can adjust the pupil detection and correction strength levels, as well as disable darkening. Settings can be restored to their default

values at any time. The idea is simple - all you have to do is create a rectangular region with your cursor over the red eyes and then save the changes. There is no Undo button available, but you can right-click a selection to remove it from the image. Plus, you can zoom in and out of the picture, fit it to window or view its actual size. Furthermore, you can change the image's size

before saving it (set the width in height in percent or pixels, constrain proportions, stretch the image), disable Red Eye Remover from confirming overwrite, as well as change the interface skin. Red Eye Remover takes up a low-to-moderate amount of system resources, includes a complete help file with snapshots, can guide you to an online animated tutorial, supports keyboard

shortcuts and ran smoothly during our tests. We have no complaints. All in all, Red Eye Remover comes with the necessary and suffice elements for removing red eye effects and we highly recommend it to all users, regardless of their experience level concerning graphic editing tools. Best software of category Graphics Software Graphics software is a type of application that can

help users manage, create, and edit digital images. Graphics software is often used for photography, graphics, imaging, and illustration. Photoshop and Photoshop Elements are the most common software of this type.
