Download Bmw Inpa Software Full 120

I've successfully installed it on my N48, but when I look inside, all the folders are empty and I only have a single "2-1" folder under My Documents. I've followed instructions to the letter and am now at a loss as to what I need to do next to be able to start using the software. Can someone help? A: The 2-1 folder is the 'root' of the BMW INPA download which you've already downloaded. It contains various folders and files that should be put in your My Documents. Download BMW INPA (Chn/ENG/DEU/FIN/GEU) * Install the Package Start the Software Afterwards you should have a lot of folders and files under your My Documents. You can find the installation steps here. * Note: This should be the newest version, it's different per country. Q: How can I convert an array of strings to an array of integers using Perl? I'm new to Perl. I have an array, $sql_arr, which contains many lines (as strings), and I want to convert it to an array of integers. How can I do this? $sql_arr = "dav_login cms_login..."; A: Since you want to "convert", perhaps this is the most direct way to do it: my @nums = map {int($_)} split //, $sql_arr; If you want to sort the resulting array, sort { $a $b } @nums; Or, to be explicit and to fix any possible parsing error from calling split with a single argument, my @nums = map { int($_) or die "Parsing error: $_"} split //, $sql_arr; Q: Do not see my problems I am not very sure if this should go into meta or meta.se. I am trying to solve a problem on the challenge website. The problem is: Find the minimum difference between two integers. The description of the problem is on the website mentioned below. I have tried several approach, and get the best answer at the moment. Here are the problems: A: I would recommend solving it using trial and error. It's hard to find the shortest difference. This program takes in a,
