The idea of the book and videos is very simple: We can help you to apply a trading system that has been shown to have a 90% success rate, in a 5 day period from the very first day. Instead of relying on regular swing trading signals, we used a strategy known as the “Engulfing” and that allows the trader to move with an exactly defined distance between the entry and the exit point of the trade. In

this way, we make it much easier for you to consistently follow the system. It is to our knowledge, the first book and video series that teaches a strategy that has been shown to work. The Engulfing is a hybrid strategy. It consists of a systematic trading plan and a natural trend system. In addition, it is guided by a set of rules and criteria that are based on market psychology. Tiemon Weller is the leader and creator of The Engulfing and is a professional trader with over a decade of trading experience under his belt. With his 25 years of experience, Timon has done everything from trading currencies and commodities to derivatives and indices. He has made a name for himself in the world of the forex trading, has an extremely high success rate and has helped many people become successful with his strategies. One of the core fundamentals of The Engulfing is the idea that everything that has been set in the past is likely to stay in place for a very long time. And the best trading strategy that has ever been developed is proven to be something that will work with very little variance, for a long period of time. In the book and video series, Timon teaches how to make the right entry and exit decisions, and how to set a trading plan based on this idea. The system is unique, but does not necessarily mean that it is not compatible with other systems. What we can offer to you is a trading system that has been shown to work, a clearly defined and tested trading plan and guidance on how to set up your trading strategy. Take your pick. Forex Trading Strategy: Introduction to Engulfing: We can say with confidence that The Engulfing is the only solution that has been tried and tested by a professional trader for the last decade. The idea behind the Engulfing is based on one of the central ideas of Michael Lombard, the editor of the Forex Trader. In

If the trade is filled, you place a stop in the same place as in the first option. Page 17. Absorption Trader - Copyright 2014. Recording. The third option is "Breakthrough Below" or ". Breakout Below, you guessed it, involves selling if the price goes below the support line and the resistance line rises. The deal involves closing the position when the price rolls back up from the support line. This scenario requires you to close the position as soon as the price rises above the resistance line.
