The file you are about to download is packed, in order to protect from the possible misuse, by the authors. The password for this file is: 9G0FNQY (case sensitive). ATTENTION: If the downloaded file is packed by our security application, for example, UPX or some other packer, in order to protect from the possible misuse, by the authors, then unpack it manually. ATTENTION: When the downloaded file was packed, as a precaution, the file name has been changed, and, as a result, the.exe (self-extracting archive) file may be also renamed, to mislead the user.

1. Unpack, using WinRAR (Windows) or Stuffit (Macintosh).
2. Install the application.
3. Copy the entire game directory, to the installation directory. ATTENTION: After the game installation, the.exe file will be placed in the game directory, not in the application directory. This is because some security software, such as McAfee, Symantec, Kaspersky, Norton, etc. detect executable files in the application directory, as a possible threat. We hope that with our service, you will be able to download files that are packed by our security program, and also,
