References Category:Villages in Ostrów Wielkopolski CountyQ: ASP.NET: How to implement "select-all" search? I need to develop a search functionality where user should be able to select all textboxes or checkboxes for that page (it's not a grid or anything like that). I was thinking about some type of jQuery selector like.select-all (and another one to uncheck/check), but I'm wondering if there is some ASP.NET framework function which does that? It is a common user's behavior. Update: Can I use javascript? Because I think there is no way to do this in ASP.NET.

A: You can use jQueryUI Autocomplete to select multiple items. HTML
