In mathematics, this is called a multiple comparison test. The basic idea is to find all. Multi Comparison T Test for Very Small Amounts Multi Comparison T Test Software for Excel Multi Comparison T Test Software for Excel Multi Comparison T Test Software for Excel -. 1. Field of the Invention This invention relates to a process of forming a pattern of the side edges of relief images on recording media, and more particularly to a pattern forming process which is suitable for forming, by a single exposure step, relief images on various types of recording media and enables formation of high contrast relief images having excellent resolution. 2. Description of the Prior Art As is well known, the conventional process for forming a relief image on a photographic material involves a first step of forming a film having a resist material coated thereon, a second step of imagewise irradiating said resist material to form a relief image, and a third step of developing the exposed resist material to obtain a relief image. According to this conventional process, however, a conventional silver halide emulsion has been generally employed as the material for forming the film having a resist material coated thereon, since it is difficult to form a thin film having a good resolution by the other conventional
