Same is true for LibreOffice.org, OpenOffice.org, and Microsoft Office. See this list of software that can open the same documents with LibreOffice (or OpenOffice in another way). A: To add to the big list of answers provided so far: LibreOffice files are saved with an.oxt extension, usually. You can open them with LibreOffice (which is what you are using now), and many other OOo/LOppid clones. It should be able to open, or print, and save as: MS Office Word (.docx,.dotx,.xlsx,.pptx,.ods,.odt,.odsx,.odp, etc) MS Office Excel (.xls,.xlsx,.xlt,.xlsm,.xltx, etc) MS Office PowerPoint (.ppt,.pptx,.pps,.pot,.potx,.ppsx, etc) If the document does not open properly, try opening it through the LibreOffice document viewer, file->Open. If that does not work, check the document properties, and the program used to create it. 1. Field of the Invention The invention relates to a semiconductor device, and more particularly to a stacked-type vertical semiconductor device and a method of fabricating the same. 2. Description of the Related Art In recent years, with the rapid development of the semiconductor industry, the channel length of a semiconductor device is continuously reduced to increase integration, and accordingly, the operation speed of the semiconductor device is improved. However, when a device with a channel length of less than 50 nm is fabricated, the channel length will be affected by the short-channel effect, and therefore, the operation speed of the semiconductor device cannot be increased. In recent years, due to the channel characteristic of a ba244e880a
