The KEYMACRO application is a screen recorder designed to create screen videos for YouTube. It allows you to record your desktop in videos with a feature that adds visual effects in real time. If you like to film videos on your computer, you'll definitely want to check this program out. Also, you can use it to turn those videos into highly engaging content, as its effects are impressive. All you need to do is to select the video format you want, then choose a background image, and lastly configure the screen capture settings you want. What's cool about the KEYMACRO screen recorder is that it records the video as it goes on, meaning that you don't have to stop everything to start and stop recording; just launch the app and go. You can start the video by pressing the Start button, so you can stop whenever you want, and you can also pause recording by pressing Pause. There is also a Built-in editor and photo viewer for photos taken in video mode. You can upload your video to YouTube and make it public. You can also share your videos using the built-in file manager. KEYMACRO is a perfect tool for recording clips for YouTube and other popular video platforms. What's New FIXED: Crashes when audio is off. UPDATE: Windows 10 compatibility. FIXED: Crashes when new computer or webcam. FIXED: Improved contrast and color. You can use the KEYMACRO app to quickly capture, edit, and upload your screen videos. It lets you easily record your favorite video clips, and you can then create videos with different modes, including HD, in a variety of frame rates. KEYMACRO can turn your videos into highly engaging content. The program has an editor and photo viewer that you can use to change the video quality, image, and the background. You can also add visual effects, such as wobbles and fades. You can upload your videos to YouTube and other popular video platforms, such as Facebook, and share them using its built-in file manager. You can even edit your photos directly in the KEYMACRO program. Why you should download the KEYMACRO app There are several screen recorders out there, but none of them feature a video recording effect that adds visual appeal. You can use KEYMACRO to make your screen video more interesting by applying a variety of effects, such as wobbles, shimmers, and pin pops. These are some of the features you 45cee15e9a
