RemindMeData is a lightweight and easy to use Java-based application designed to provide you with a simple digital agenda. It can be used for writing down important information, taking notes and creating to-do lists. The notes are organized into different

items, enabling you to access them anytime. The user interface of the application was inspired by the concept of a digital day planner. You can insert as many notes as you want into an agenda, you can also separate your tasks into different categories, and define different colors for each category. RemindMeData has a simple

and intuitive user interface that provides options to change the views and colors. Screenshot Preview: What's New: * New: The app is now available in Italian! * Fixed: The app did not reload the data when loading a saved agenda. * Fixed: The app did not load the data of a single note. * Fixed: The iPad version no longer crashes

when dragging the note card too fast. What's New: * New: The app is now available in Italian! * Fixed: The app did not reload the data when loading a saved agenda. * Fixed: The iPad version no longer crashes when dragging the note card too fast. What's New: * The iPad version now has a Coverflow-like mode of the cards to browse all the

notes of an agenda. * New: The app is now available in Italian! * Fixed: The app did not reload the data when loading a saved agenda. * Fixed: The iPad version no longer crashes when dragging the note card too fast.
