Networks Graph provides a simpler way to interact with your network and computers. Networks Graph allows you to create a custom workspace that runs in the background and acts as a real-time network traffic monitor. Networks Graph can help you get the job done even when your computer screen is turned off. Allot more connections per day than just one. Networks Graph is powerful and easy-to-use. Unlike some other network monitoring tools, it can monitor both incoming and outgoing data. See your network activity in real-time. Networks Graph uses network statics (like bandwidth, packet drops, latency, etc.) and machine status (like CPU, memory, disk space and uptime) to create a graph of your network activity. Your computer never has to be on for Network Graph to work. Networks Graph has a simple to use interface that allows you to monitor both incoming and outgoing network traffic, and it supports the following operating systems: Windows 7 x64 Windows 8 x64 Windows 10 x64 Mac OS X 10.7 (Lion) Mac OS X 10.8 (Mountain Lion) Mac OS X 10.9 (Mavericks) Mac OS X 10.10 (Yosemite) Mac OS X 10.11 (El Capitan) Linux (unsupported) Networks Graph is all about simplicity. Easy to use. Create custom graphs from the widget that shows you your network activity in real-time. Networks Graph supports IPv4 and IPv6. Networks Graph can also be used for bandwidth monitoring. In the event that a network service goes down, Network Graph will be able to alert you and send you email when network services are back up and running. We have a lot of features. View network activity in real-time, right from your computer desktop. Make customizable widgets that display your network activity in your desktop. See all your computers' network activity in one place. View detailed network traffic statistics in an informative graph. Networks Graph doesn't require your computer to be

on in order to monitor your network activity. View statistics for inbound and outbound network activity. Get notifications when services go down. Networks Graph supports several different operating systems: Windows 7 x64 Windows 8 x64 Windows 10 x64 Mac OS X 10.7 (Lion) Mac OS X 10.8 (Mountain Lion) [09e8f5149f](#)
