Total control over your session with SessionLog studio software. If you start a song and then decide to stop it, end it or add to it, you can immediately get the new track info on your computer. Properties: – Song Titles – Lyrics – Music – Length – Keys – Times – Stock Available in two versions : – free version with only basic functions – paid version with enhanced functions and export function. If you have the MovieMedial–Joel version, just put the following tag: "JoelMedial" on your sessionlog.xml file (you can add several tags, but the last one doesn't overwrite the previous ones). If you don't have MovieMedial–Joel version you will need a 3rd party plugin, see title "Required Plugins". Installation ✖ That "jars" is a bundle of all plugins. After downloading those files, you need to extract them by using Windows XP or Windows 7 and then double-click the.jar file for each plugin, each plugin will be installed as an individual program. If you have more than one folder in the "download" folder, unzip them into subfolders. Drag the file "com.MindC.MM\_ArtistSessionLog.jar" into your plugins folder; it's the actual plugin file. Once you have all the plugins that you downloaded in the plugins folder, go back to where you downloaded the MindC software, and create a new folder called MindC. Go back into the plugins folder you made and create another folder and name it to M. Save all of the plugins you downloaded in the plugins folder in this new folder you've created. You now have 2 separate folders. Go back to the plugins folder and extract the file "com.MindC.MM\_ArtistSessionLog.jar" into the plugins folder you created. How to use Start a song, once you've heard the first track, hit the Stop button (same as the Record button in recorders) if you are recording a song, or hit the Stop button a second time if you are already recording. Once the song is finished, the stop button will return you to the song. Click the start button to begin recording another song, or you can record a whole album by clicking the start button and play it back the way you play a CD.
