---

Virtual Serial Port Kit creates pairs of virtual serial ports in your system, which are virtually connected to each other. [...] Each virtual serial port has a unique number that you can use in the program to communicate with it. [...] Creating Virtual Serial Ports using the Virtual Serial Port Kit. Step 1 Open Virtual Serial Port Kit. Step 2 Click the Add New button. Step 3 Select the "Serial Port" device type and click Next. Step 4 The name of your virtual serial port should look something like this: "Serial1". Step 5 Select the Enable Parallel Port check box. Step 6 Then go to the Options tab and in the Parallel Port Settings field, select the Enable Parallel Port check box. Step 7 On the Options tab, click the OK button. On the ATA-ATA.sys program window, click the OK button. Click OK to close the System Properties dialog box. Run the ATA-ATA.sys program and check your computer's boot results.
