Category: MacOS programming tools Evidence of coronary artery disease in a case of type B hyperlipoproteinemia. A patient with type B hyperlipoproteinemia and intermittent chest pain is described. Electrocardiography and a thallium-201 myocardial scintigram showed normal findings. At coronary angiography evidence of coronary artery disease was found, but the only significant stenosis was in the right coronary artery. Treatment with resinsatrol and bile acid 82138339de
