FULL NAME. : This is the text which will be placed in a new Blank Canvas.

Q: are the means of two distributions equal? Suppose we have two independent random variables X and Y with density functions: $f_X(x)=1, x \in (0,1), f_X(x)=2, x \in (1,2)$. It is easy to see that the mean of X is $1/2$ and the mean of Y is also equal to $1/2$. Is it true that the mean of $X+Y$ is also equal to $1/2$? My intuition is that it is not true. Could you please give me a counterexample or a proof of the statement?

A: No, it is not true. For instance, the density of $X+Y$ is $f(x)=1$ if $0 \leq x \leq 1$ and $f(x)=4$ if $1 \leq x \leq 2$.

Philippines President Rodrigo Duterte is repeating a claim that the archipelago will not be visiting the United States or other Western countries in the future, declaring "We are no longer going to be America's bitch." Duterte made the comment during a visit to the University of the Philippines in Manila on Sunday, according to the South China Morning Post. He said, "Ang mga American ay alam kong may tamad nila, hindi ka nila alam. They will not say to me, 'Mr. President, you can do anything you want to do. You can harass, you can kill anybody. You can destroy entire areas.' "I will not be blackmailed." Duterte has previously made similar claims, saying his country

would not bow to the U.S. or pressure from Washington. He said during an address last week to a regional security meeting in Davao City, his home province, that the country would not be visiting the U.S. anymore, according to Reuters. “You do not need to come to our country anymore. I will not be visiting the U.S., I will not be going there with the first batch of aircraft,” he said. Duterte's latest comments come as a presidential election
