Most of the time, you are not aware of certain commands that you can execute with a keyboard shortcut, and Macro makes it easy to assign one to any key you want. Although you can assign a shortcut to nearly any key on your keyboard, you can also assign a shortcut to any function that you want, so that you can run a command, such as sending an email, creating a new file, or browsing a web page by simply pressing a certain shortcut. Macro Macro is easy to use and works flawlessly. You simply create a profile by placing the name of the command you want to execute in a folder and then assign a keyboard shortcut to it. After that, it is as easy as that, and you can try it out to see whether it works as you expect it to. However, you must be aware that you can only use certain commands for which macros have been created. Furthermore, there is one more thing to be aware of. If you change the file to which the macro is assigned, you must change the profile. It is advisable to keep Macro profile names as short as possible, because they will be stored in the folder where you have placed them and cannot be changed. It is extremely easy and convenient to use. CCleaner is a freeware that allows you to use a clean and free registry and free up disk space by removing the files, folders
