Change cookie value in the middle of a session I am using CakePHP to store the users credentials. Basically, when the user logs in, a cookie is set to their username, this value changes every 10 minutes. The value is used in a page to check if the user is logged in. The value of the cookie changes as expected, however the value is not the old username, it is the username + '\_' + new\_time\_cookie, for example if the cookie value is 'test' and it's updated 5b5f913d15
