And his website: The confusion: The way file source describes: File Scavenger 4.2 is used by forensic examiners to recover deleted or otherwise lost files from corrupt or damaged disks. The File Scavenger version 4.2 key is: File Scavenger 4.2 keygen As you can see, both download pages are very similar. My question is, how are those two files different? How does one know that he/she is downloading the correct file? A: These files are probably two different versions of the same tool. The image with the crack is probably for a version of File Scavenger with an older license key and is likely to work for older versions (4.1 or 4.2) of File Scavenger. If you buy the version that is described as File Scavenger 4.2, you get the new key and the newest version. Q: How to add server name prefix to HttpContext.Request.Url.Host in IIS On Windows Server 2008 I have a folder with Virtual Directory. When in the folder the files can be viewed through web browser by Is it possible to add a prefix to the server name, so that the domain would be used: Here is my configuration: 54b84cb42d
