Self-expanding metal stents (SEMS) have recently become available for the palliative treatment of malignant dysphagia. We aimed to assess the safety, feasibility, and efficacy of self-expanding polytetrafluoroethylene (PTFE) stents for the palliation of malignant dysphagia. This study was a retrospective review of patients who underwent placement of self-expanding PTFE stents for the palliation of malignant esophageal dysphagia. We evaluated the technical and clinical success of stent placement, complications, patient outcomes, and duration of palliation. Seventy-six patients underwent placement of 124 self-expanding PTFE stents for the palliation of malignant dysphagia. Sixty-eight percent of patients had inoperable esophageal carcinoma. Technical success was achieved in 96.9% of patients. Major complications occurred in 10.5% of patients, including 1 pneumothorax, 2 self-remodeling stents, and 7 stent migration events (each of which necessitated further stent placement). All stents were successfully deployed to provide palliation of dysphagia, and 67% of patients had > or =6 weeks of palliative efficacy. Median duration of palliative efficacy was 29.0 days (range, 0

## What's New in the?

DxO PureRAW is a relatively simple application for converting RAW files to DNG format. It is designed to be a middle ground between free RAW converters and full-fledged editing tools. DxO PureRAW is integrated with a set of advanced technology that provides high-quality, high-resolution RAW conversions. It boasts a simple and clean interface, making it very easy to use. Once the selected files are loaded, you can perform various operations to improve the image quality. Finally, the image format is DNG, which allows you to convert them to different formats using programs such as Photoshop, Lightroom, CaptureOne or Aperture.
