Spyrix Facebook Monitor Crack Keygen Full Version

Spyrix Facebook Monitor is a tool that helps you record and manage Facebook activity on your PC. You can monitor visited webpages, visited profiles, uploaded images, viewed messages, as well as keywords typed into the web browser or chat. The tool also allows you to take a snapshot of the web browser screen, record the internet search queries, specify keywords that will be executed via the active browser, or hide the program when it is not in use. Another interesting feature includes SMS monitoring. You can send automated text messages to your contacts, specifying particular words, types of messages, and keyboard patterns that will be automatically sent to the monitored phone number. You can also send alerts when users type particular words or phrases, you can modify the log and remove it when it does not contain any useful information. You may make the log viewer visible or hide it from Task Manager. You can also hide the utility from the taskbar, as well as lock its features. What's more, the log allows you to view the screenshots, as well as the clipboard text, the web pages that were viewed, search terms, and date and time. You can sort the entries by date and time. The tool also allows you to specify your user account and collect the statistics for up to 1, 5, 10 or 50 users. You can schedule log records to be taken and allow the utility to keep them for a custom date and time period. Spyrix Facebook Monitor also offers customizable hotkeys for launching and hiding the program, as well as it supports sending log files via email, FTP, and local network. Version 6.4: - Monitoring Facebook profiles: A new monitoring option monitors the activity on the Facebook profiles being accessed on your PC. Now you can monitor the visited profiles, uploaded images, viewed messages and news. - Log file name change: You may change the log file name and modify the location and size of the saved log file. - Search tool: You may now search for webpages and keywords while monitoring the website address bar and search bar. - Advanced security: You can define the security levels for the monitoring tool by specifying the minimum password length and the password change interval. - Log size change: You can now change the log file location and size. A revolutionary new utility that not only monitors Facebook, but also records the web pages that you have visited in the last 12 months. A revolutionary new utility that not only monitors Facebook, but also records 91bb86cfa

Spyrix Facebook Monitor License Key Latest

- Spyrix Facebook Monitor is a professional monitoring application built specifically for helping you record Facebook activity, such as viewed profiles, uploaded images, messages and news. - Additionally, the tool allows you to keep track of keyboard events, take screenshots, capture snapshots via your webcam, check the visited webpages and clipboard content, send email notifications, and display alerts. - Straightforward layout Although it comes packed with many dedicated parameters, you are welcomed by a clean feature lineup that allows you to configure the dedicated parameters with minimum effort. Plus, it offers support for a step-by-step approach, which comes in handy for rookies, as they are guided throughout the entire process. - Comprehensive logs Spyrix Facebook Monitor features a fast and efficient monitoring system that captures a user's activity to a log. The log provides information about keyboard events, namely typed keyboard characters for each application, and lets you preview the screenshots, check data stored in the clipboard, as well as view the visited webpages and search queries. - All the aforementioned options can be applied for Facebook separately, and you may perform search applications, as well as sort data by date and time. - Configuration settings The program comes bundled with several handy parameters designed to help you run the tool at Windows startup, open the app in the hidden mode and conceal it from the Task Manager, Start Menu, Installed Program List, and system tray icon. What's more, you are allowed to assign a hotkey for hiding or revealing the utility, and add a master password for making sure other users cannot change your settings. - Other notable characteristics worth being mentioned are represented by the possibility to automatically take a screenshot when the active window, URL, or clipboard data is modified, receive alerts when custom words, phrases, and webpages are entered. Last but not least, you are allowed to select the user that you want to monitor, record the period of inactivity for more than a custom time, as well as block websites based on whitelists and blacksites. - Bottom line All in all, Spyrix Facebook Monitor proves to be a reliable application that comes packed with many useful parameters and an intuitive layout for helping you carry out the monitoring process. Spyrix Facebook Monitor News: - Spyrix Facebook Monitor is a professional monitoring application built specifically for helping you record Facebook activity, such as viewed profiles, uploaded images, messages and news. - Additionally, the tool allows you to keep track of keyboard events
