- Overdrive - Pure filter - Clarity - Effects - Add effects in the right chain - 3 user-controllable jacks - Global gain - Quality decoder (only in v3.13+) - Masterbias can be controlled by parametrically modulated envelope or LFO (or by a MIDI CC) - Independent volume controls for each effect - Special settings for different styles (overdrive, bass, lead, etc.) This plugin can be quite useful in a system of several studios, especially used for mixing, where one channel has to be sent over to the central mixer. However, this plugin is a little unstable on Windows 7, due to the fact that the sounds are being output directly from the CPU instead of from the GPU. The reasons for this are not clear to me, and I do not want to go into details because I hope that this bug will be fixed for the future releases. Recommended System Requirements: - VST/VST3 Plugin Host - Windows 7 - at least 32 GB of RAM New features: Version 3.10: - Integration into Ableton Live (A16) - Reverb - Reverb presets - User presets - Reverb in the side chain - Live mapping of included VST effects Version 3.09: - Add Reverb - Add Reverb preset - Add user presets - Map to the master output - User preset data storage (more than 1 user preset) Version 3.08: - Add Pure Filter (can use 2 octaves) - Add Panning - User preset data storage - Clean output - Clean enable/disable Version 3.07: - User presets Version 3.06: - Masterbias - Finest control Version 3.05: - Masterbias - Arpeggiator Version 3.04: - Rate shaping - Masterbias Version 3.03: - User presets - Automatic release - Realtime Rate Shape Version 3.02: - User presets - Pure Filter - Masterbias Version 3.01: - Obsolete: LFO Export/Import
