# Controlling the pixel dimensions of an image You can change the dimensions of an image using the Size command. See the following steps to change the pixel dimensions of an image: 1. In the Layers panel, select the image you want to resize. You're changing the pixel dimensions of the layer, not the layer itself. To select a whole layer, select the topmost layer in the Layers panel and press the A key to activate the Selection tool. 2. Choose Size from the Resize menu and select the property you want to adjust, as shown in Figure 2-5. You may have to manually type in your desired value if the format isn't available; Photoshop doesn't autodetect the correct value. FIGURE 2-5: Use the Size command to change the pixel dimensions of an image. In the following steps, you control pixel dimensions using four different methods: The Pixels/inch property: To adjust the number of pixels per inch (ppi) of an image, type the number you want into the Pixels/inch box and press Enter. The image's pixel dimensions then change. You can specify ppi values of 72, 150, and 300. If you don't know the ppi of your monitor, look at the manufacturer's specification on the back of the monitor. The DPI setting: The DPI setting adjusts the dimensions of your image, if you know the recommended print size for your image. For example, if you're taking a portrait of a person and you want to print it in 10 inches by 15 inches (15.5 inches by 38.1 inches) on legal-size paper, look in the Graphics Options area of the Print panel of the Image dialog box and enter 300 dpi. After you enter the dpi in that dialog

In this tutorial we'll show you how to use the Liquify filter to add motion blur to your images and turn them into a quick and easy alternative for time lapse videos. So get creative and have fun transforming your images! Step 1 – Identify Objects Place your mouse cursor over a background object, such as a flower, a tree or anything else in your image. While you are hovering over it, open the Liquify filter by clicking the filter button in the Filters panel on the bottom-right of the window. Step 2 – Move the Object When the Liquify dialog appears, click the stretch (slide) tool. Make sure that the Edit tool mode is set to pinch. Step 3 – Stretch the Object Move your mouse towards the image and drag it to its new position. The object will bend into the shape of your mouse when you finish dragging it. Step 4 – Adjust the Morph Object Tool At the top of the dialog, use the controls to adjust the object to give it a more realistic look. You can choose which side of the object to change, the number of shapes to create, the speed of transformation and the number of layers. To change the view orientation, click the image icon in the upper left corner of the window. Step 5 – Apply and Stop the Liquify Effect Once you have adjusted the object, click the checkmark button on the bottom-right of the dialog to apply the effect and stop further editing. Step 6 – Saturation You can use the saturation tool to enhance an image's brightness levels. Go to the Adjustments panel and choose the Saturation tool, which is the center tool in the palette. Step 7 – Adjust Saturation To adjust the image's brightness levels, click the slider for the saturation. A gray bar will appear, as in the image below, with white and black representing the most and least saturated parts of the image. Adjust the image's brightness levels by adjusting the saturation slider. If you apply too much saturation, the image may look unrealistic. The brightness levels won't be very different, as your eye sees saturation as a brighter image. When you apply too much saturation, it will be very hard to see the fine details of the image, making it unrealistic. To avoid this, you can adjust the saturation, but avoid going into a picture a681f4349e

Randomized controlled trial of two suture methods for percutaneous implantation of the HeartMate left ventricular assist system. We performed a prospective randomized trial comparing the 1-0 with the 2-0 Prolene suture method to secure the percutaneous cannulae to the left ventricle of the HeartMate left ventricular assist system (Thoratec Laboratories, Pleasanton, Calif). From July to October 1995, 113 patients awaiting placement of an LVAD were randomized to one of the two suture techniques. Eighty-seven patients underwent successful percutaneous LVAD implantation (trial group, n = 44; control group, n = 43). The mean patient age was 44 years in the trial group and 44 years in the control group. The mean left ventricular end-diastolic pressure at the time of LVAD implantation was 30 mm Hg in the trial group and 32 mm Hg in the control group. The mean duration of LVAD support was 180 days (range, 10-595 days) in the trial group and 180 days (range, 5-530 days) in the control group. There were no differences in left ventricular end-diastolic pressure, duration of LVAD support, or mean LVAD flow rate (range, 1.8 to 2.6 L/min) at the time of LVAD explantation between the trial and control groups. The 1-0 Prolene technique is as effective as the 2-0 Prolene technique for securing the HeartMate left ventricular assist system percutaneous cannulae. The success rate was 100% in both groups, and there were no device-related complications. The present invention relates to a system for producing granulated magnesium chloride from magnesium chloride by vapor phase dehydrochlorination in the presence of an alkali chlorite and an alkali nitrite. The production of chlorides of magnesium is taught in numerous patents. For example, U.S. Pat. Nos. 3,272,797, 3,852,212 and 3,981,851 (and corresponding Canadian Patent 821,148) teach such processes in which magnesium chloride is produced from a magnesium chloride containing liquid melt by reaction with chlorine and chlorine-containing gases. These processes require expensive equipment to produce the evaporated liquid melt and convert that material to magnesium chloride. U.S. Pat. Nos. 3,907,804 and 3,964,337 teach methods for the

Annie Ruth Carson Annie Ruth Carson (June 30, 1852 – June 16, 1936) was an American writer and social activist. She was a teacher of US Presidents Warren G. Harding, and Calvin Coolidge, and former kindergarten teacher to US President Franklin Delano Roosevelt and his son, Elliott Roosevelt. Biography Annie Ruth Carson was born in Clinton, Onondaga County, New York to Captain Joel and Annie Carson. She grew up in New York and attended public schools there. When she was in the 7th grade, she joined the Normal School movement, graduating in 1869. Carson continued her education, earning a teaching certificate in 1871 and a master's degree in 1874. She began her teaching career in 1876. She married neurologist Dr. Ernest Woodford in 1879, but that year, her father died; two years later in 1881, she had a son, Joel Woodford. Her first child, a daughter, was born in 1885. In 1888, she gave birth to a son, Arthur Woodford Carson, when she was 38. During this period, her husband and family lived in Northampton, Massachusetts. He later began a medical practice in Boston. In 1895, she became the kindergarten instructor of the Roosevelt family. In 1896, she was the one who wrote the story and co-authored the book *The Problem of Intellect*. She was instrumental in the creation of Franklin Delano Roosevelt's famous "Cabinet of Curiosities," which displayed in the White House various items Roosevelt collected, including stuffed birds and animals, butterflies, and snakes. In a presidential executive order, on January 25, 1905, President Roosevelt made Carson a federal agent of the U.S. Customs Service. In 1911, she became a specialist of kindergarten instruction. In 1915, she was appointed to the President's Advisory Committee on Community Chest Work. In 1919, she was appointed to the American Commission for the British Women's War Relief Bureau. Carson was one of the earliest public feminist activists. In addition to her various works, she co-authored *The Problem of Intellect* with John Deane Fiske Jr. Carson died in New York City on June 16, 1936 of a heart ailment. Her papers are archived at the Boston Public Library. Work Carson was an accomplished writer who published several poems, stories, and biographies, including various works on kindergarten education. She
