A: You've mixed up site\_path and.android\_sites. You're getting the site\_path becuase it is in the sites array, while you're looking at the sites array in your AndroidManifest.xml. Change that: /sites/site1.kunde.de Im going to give this a test drive Hello all newbie here. I have been lurking for a while but not posting much. I started brewing about a month ago and am now getting to where I need to be. My questions is what grain to use for a porter? I am looking at using Maris Otter but don't know if I should use a mash temperature of about 1.56 and do a big mash. I am going to use the water profile from here I read on the forum here that the conversion rates on most porters were about 1.105-1.125 for English Porter and 1.085-1.115 for a Scotch style Porter. But the batch size was around 2.5 gallons of volume. Is my assumption that I should use 2.5 gallons of volume. Is my assumption that I should use 2.5 gallons of volume. Is my assumption that I should use 2.5 gallons of volume. Is my assumption that I should use 2.5 gallons of volume. Is my assumption that I should use 2.5 gallons of volume. Is my assumption that I should use 2.5 gallons of volume. Is my assumption that I should use 2.5 gallons of volume. Is my assumption that I should use 2.5 gallons of volume. Is my assumption that I should use 2.5 gallons of volume. Is my assumption that I should use 2.5 gallons of volume? Another question is when you brew you using a ratio of 1.2 for your IBUs? I read on the forum here that the conversion 82138339de
