- Drum Rack Channel 2 & 3: (PC only) Extends the value of drums and percussion on those channels with the use of the Keymacro. The Keymacro is a real-time control of your drum mixer. You can assign a macro to a channel, the program and the automation. Thus, it allows you to handle your automation levels and assignments easily.

- Scatter: (PC only) A reliable and intuitive scatter sends your channel output from to the input of your effect. This effect is great to remove background sounds or to make your drum and percussion sounds louder in a mix.

- Simpler and more sound! (PC only) The feedback of the previous version on the sound quality was harsh. Now, the simulation of the previous days is improved to a much more more pleasing sound quality. It is for you and your listeners to enjoy the pure sound of your music without simulation.

- Keyspan - (PC only) A low-latency MIDI controller with flexible assignment options. Using the Keyspan you can control your multi-track sequencer or your drum mixer. You can assign your macros to channels, instruments or sequence steps. Furthermore, you can define ranges and assign macros to parameters and macros.

- KeyStat: (PC only) With the KeyStat you

---

can view your detailed macros, existing macros or the global macros of the plugin. You can do that with two options: 1) You can display the macros in a window that follows your track's timeline. 2) You can view a chart that lists all your global macros. - Save and Load: You can save and load your macro settings with a single click of a button. - 5 additional filters: You can set 5 different filters for your VST2 plugin. These filters are used for the reverb, chorus and the flanger. You can set these filters and their settings yourself in the menu of the plugin. - Variable panning: The default panning of the plugin will be 100% left and 100% right. You can change the default panning with the menu of the plugin. - MIDI Learn Mode: MIDI Learn mode allows you to assign your macros on your controller. You can set your controller to Control Change and assign the command directly to your macros. - 3 different display modes: You can display your macros, existing macros or the global macros of the plugin. You can do that with two options: 1) You can

--> Beautiful water effects and soundscapes --> 19 water profiles --> 3 band equalizer --> Automation --> MIDI Learning The WYSIWYG interface allows you to create and load profiles. Download Noak's Studio: [www.myspace.com/noakmak](http://www.myspace.com/noakmak) [www.noaknoak.com](http://www.noaknoak.com) It's been a long time coming, but my Christmas present to you all is here: River is now officially available as a free download. Over the past few months I have been working on this plugin as a fun project to try something different and make the free VST plugin scene a little more vibrant, and I am very happy to release it to you all. I am going to be posting some new tutorials for it over the coming days, because I really love this plugin and I think it has a lot of potential, and I am excited to see what you guys do with it. There are 19 presets included in the first release, but I am already working on a full VST version and will make it free when it's ready. It'll be out sooner than later I promise. I also want to give a big thanks to Jan Scholz for providing all the audio sources for me, and to Scott Morrison for bringing my attention to the oscillator
