When it comes to working on your audio files, the Internet is filled with all sort of software solutions that could help you with just that. One of them is AVmixer Pro. It's a neat software solution that allows you to edit videos using audio mixer-like interface. It allows you to create live visual performances on your computer. Simple and straightforward graphical interface The application installs quickly and it doesn't come with a complicated setup that you would need to complete before you can actually use it. It sports a really intuitive and clean graphical interface that makes it easy to mix files. It lacks customization options, but you wouldn't really need them since it comes with lots of neat tools available. Still, it would have been nice if it had some tips and instructions on how to use the application. Mix files easily You simply need to browse your computer in order to load a movie folder or you can drag and drop the folder inside the application. It comes with the option to randomly play movie clips, you can enable Syphon video input, randomly jump on timeline or scrub movie timeline. It also lets you set a loop in or out point, or adjust loop modes. You can also play or pause files, adjust playback speed and set the resolution. Frame effects can be added and the application has the option to use two mixers. The first mixer is for mixing and compositing between Channel A and B. The second one is for mixing Channel A and B's sub-mix with Channel C. These two mixer's functionalities are identical. All in all, AVmixer Pro is a very useful application for creating and editing videos using lots of mixer modes, MIDI support or other neat features. AVmixer Pro Free is a cool audio swiss army knife.
