Lots of minor fixes and improvements around the track, adding details, fixing bugs.n Vehicles: Small print on outdoor destination signs. Highlighting corners in other colors. Issuance of information about the destination, including the logo and the status of the status at the stop. Improved work with the introduction of amendments and adjustments. Changes have been made to the EUD dialog boxes, Entering and receiving meter readings.n Working with the

Emergency Calls service: * In the meter table, the fields "Method of transferring readings" and "Source of information" include information about the status and connection direction. * A button for quickly selecting a unit of measure has been added to the application header. (space + â^TM)* Two commands have been added to the access rights settings: "Dial number" and the choice of any operator. * The "Cancel" button has disappeared from the "Settings" context menu. *

Improved operator selection dialog. Fixed a bug in the rules for selecting operators and in the dialog for selecting an operator from the list. * On the Requests tab in the contacts table, the "Press the service call button" parameter has been added (in this case, *). * Changes have been made to the radio signal selection dialog. Removed information about the signal used by the subscriber for communication. * There is information about the readiness to send a message. * Reduced

waiting time for operator response. The mechanism for unloading the protocol with scripts has been changed. Not only information about users and sessions is recorded, but also logs of their states and errors. When creating a session, an additional field is used that indicates the type of list to the user (operator, subscriber, etc.).* Fixed errors when transferring a login via the Internet, as well as messages about unauthorized access to the Internet.n Mileage warnings: *

Changed the error when the mileage data has not been deleted since the last warning.* Fixed a bug if the mileage was shown with a large number of errors.* Added the ability to vote on the notification of the restoration of the log entry. (Redeye)n Work with the list of records: * Added binding of records in lists (categories) to columns. * Added notifications about events in the mode of working with lists. * Significantly improved mechanism for searching records.

* Fixed placement of phone numbers in the "hotels" column in the directory. * Improved stability of the multi-list operation
