Commonly, you can add them to your cart as a free gift when buying. Frequently though, you will find them within the item description. They are things like discounts on shipping costs or gift certificates for exclusive bonuses. In terms of offerings, you can hardly expect a book voucher as a gift. However, if you are a Facebook user, you can be aware of the so-called Gift Card for Facebook members. The shop keeps the gift and gives you the opportunity to enjoy your gift card the moment you create an account. Basically, if you are a Facebook fan, then you can simply follow the link provided and you will see the code of your gift card inside your invitation e-mail. At that point, you can use the code to buy what you want. So, if you use a voucher, then you can also get a discount when you buy something. How to redeem the offer? In this case, you need to visit the offer provider and click the Facebook promotion. You will then get the chance to either follow the link to create an account, or enter your e-mail address. This should grant you access to use your gift card the moment you log on to your account. If you need to redeem a promotion and learn how to do that, you can easily reach the FAQ area and look for Facebook Gifts to learn more about the process. In terms of potential pros and cons, you can notice that the offer requires you to create an account. This is why you can enjoy more benefits only if you are a Facebook member. You can also notice that only the code is given, and you can't check the conditions or see an actual gift card. However, if you get what you want after creating an account, the initial cost is discounted if you use your Facebook gift card to purchase something. Moreover, you should keep in mind that the code can be redeemed in the UK or Europe, and you will have to log on to your account through a Facebook or Amazon account, which is not always the case with the free gift voucher. I saw this offer recently and decided to
