Features: ⍰ Registration process. ⍰ Send registration letters to users' mail box. ⍰ Automatically create reports. ⍰ Generate license key from registration number. ⍰ Automatic keygen. ⍰ Submit registration orders to sites with one click. ⍰ Ask surveys. ⍰ Simple, easy-to-use interface. ⍰ Predefined templates. ⍰ Online help and support. ⍰ Import/export settings. ⍰ Complicated settings can be displayed in the GUI window. ⍰ It is the first shareware software which contains built-in software solutions for statistics and business graphics. ⍰ You can build your own templates from the same page. ⍰ You can share sites collection with other Software-Promoter users. ⍰ Restores sites collection from backup files. ⍰ Restore a collection from the server. ⍰ It is the first

What's New In Software-Promoter?

Software-Promoter is a project to create an very easy to use website promotion tool and software distribution server. This tool helps the developer to distribute a program to the web community more speedily and to receive the orders of the customers. This tool is specifically intended to promotion shareware software programs, but it has other purposes: it can help your business, create your books, deliver your service or generate your server. You can use the software-promoter tool to: - Make your website easily accessible to others for free, without any technical knowledge of HTML coding. - Make your website easily accessible to your customers. - Create a submission profile to try out the software or services of your website. - Deliver your service. - Deliver your web files (PAD files) to the websites for your customers. - Make the order forms for your customers and business partners (see full example). - Make up to 15 days trial to your software. If you want to see a more comprehensive list of features, see page Features. Also, if you want to read and participate in our newsgroups, see Current Development. The program runs on Win95, Win98, WinME or WinNT. This program includes our user-friendly article submission software-promoter.exe which is a tool to build your website or deliver your application for free. You can be the first to receive the customers directly to your site without any technical knowledge of HTML coding. What can you do with software-promoter? Define your computer in the scheme of a web navigation and distribute it on the Internet. Creating your business, with your own discussion forums, working time clocks, shopping baskets and auction. Generate up to 15 days free trials to your software. Distribute your product to the software sites by the web interface without any expertise in HTML coding. With the developer's article submission software-promoter (PSP) you can create your own site. The free version of this software is already included. You can fill in the site properties or the article submission software-promoter (PSP) can help you configure them as you want. The basic version is also included: - Shipping a program to the market. - Creating a particular page, program, article or service for the new

clients. - Distribution of your website to the web community for the free. - Grouping your website with other authors and create a newsgroups and mailing lists
