 windows 7 Why use Microcode Studio: It is important to note that the IDE comes with many features which other
 IDEs don't have. It is possible to customise the entire look of the IDE using skins, themes and icon sets. You can
 change the colour scheme for documents, bookmarks, files, open windows, menus, buttons, labels, scroll bars,
 toolbars, gutter region, indicators and more. It is even possible to set the colour scheme for the code explorer and
 properties windows, the text in code explorer windows, tools in the toolbox, text in files, screen magnification and
 much more. You can adjust anything you want via the Preferences dialogue which is right-click menu accessible. With
 a clean, comfortable and configurable IDE it is more than likely that you will get an editor which fits your style, and
 you will no longer have to spend time finding it which is what a lot of users tell us is the biggest problem. Download
