* FindHiddenVideos helps you find out if your child is hiding adult videos on his computer or yours! * Over 5 million families trust FindHiddenVideos! * It's the #1 software on the Market! * As hidden content gets updated, this new version is always up to date! FindHiddenVideos is a straightforward utility that helps one find any hidden clips stored on a drive. However, the developer advertises this tool as a means to find out if your child hides adult videos on his computer or yours. No matter for what reason you're trying to find hidden files, this utility can come in handy anyway. No installation required Some kids get around how a computer works very fast, some don't. Still, this application is portable, so you don't have to install it, which would be immediately noticed by a sharper kid. Just unzip it and run it without any tweaks or configuration to care about. Uncovers videos even if their extension was modified FindHiddenVideos can help unveil hidden videos based on their file signatures. Thus, even if the videos are renamed or their file extension is modified, the application can still track them down. As for how the tool actually works, that's pretty simple. You select a folder or a drive for it to scan, and all the videos found within will be displayed in a list. Figuring out which are hidden is also easy to do, as they are marked "Hidden" under the Attribute category. To unhide a video, one has to right-click on it, and set its attribute level to normal. Additionally, you can navigate right to the file's location, from the same context menu. To conclude FindHiddenVideos is a quick way to check on your kids to see if they're hiding harmful content such as adult videos, gore videos, or any other materials a child shouldn't be seeing. On top of that, this tool can help any user find hidden clips which they've forgotten the directory of.
