## RSS-Feed Windows Live Messenger Add-In Crack +

\* Create a URL feed (e.g. that points to your RSS-Feed which contains the status update. \* Create a shortcut to the URL feed. \* Select 'Use as wallpaper' \* Install the Add-In. \* Select 'Use as Wallpaper' and change the appearance to classic and select the created shortcut to your Live Messenger Status Feed. \* Create a new message (e.g. C:\Users\UserName\Desktop\WallpaperExample.gif) with the right command line arguments (see KEYMACRO below). When you launch the application the shortcut will be replaced with the previously created status message. When you delete the application the icon is replaced with the previous status message. KEYMACRO: C:\Program Files\Windows Live Messenger\Mscrm.exe [parameters] [parameters] [parameters] [parameters] "C:\Users\UserName\Desktop\WallpaperExample.gif" This example will create a wallpaper image with your current Live Messenger Status Feed, replace the icon with the wallpaper image and send the image to your default wallpaper directory. (The parameters are filled with the Live Messenger parameters you defined for your shortcut). The Live Messenger Status Feed is delivered by our expert programmers and contains all your statuses and your personal information from Live Messenger. Notes: \* Make sure to enter the Live Messenger parameters correctly or your shortcut won't work. \* Make sure to enter the parameters exactly like shown in this example. \* Do not use quotation marks around the filepath of the created image. \* Make sure the Live Messenger application is running. \* Make sure the created image file doesn't exist. \* If the image file already exists, just replace it. \* If your Live Messenger application isn't running (e.g. when you uninstalled it) use this link instead: This script will create the necessary registry entries and shortcuts required for Windows Live Messenger to use a plain old plain text status update for chat. The idea is to use simple text based status updates (e.g. "Just went out for lunch at McDonalds"), which are the default updates that Live Messenger uses when you configure the application. Tested with Messenger 7.50, 7.55 and 7.60. Note: this script is only required for users 1d6a3396d6
