As we are now doing all calculations in floats, I could just export the CGFloat property values and use the float values anywhere I want. This however isn't possible in Cocos2d, and I'll have to convert to integers. That is, my models objects have properties such as float size, float position and so on. I want to be able to display them on screen and be able to scale them up or down, in any way that I want. I don't want a sprite sheet. What is the best way to achieve this? Do I need to code 82138339de
