The software was renamed the third time in 2012 when it was given the new name of "Maya 2012". It is one of the first major changes to Maya since its inception. The Maya 2013 release is named as such because its function and compatibility are limited to 2012. On March 13, 2012, Autodesk released a new version of Maya 2012. It was immediately upgraded to 64-bit because 64-bit architecture is now the standard on desktop computers. 3ds Max 6 was released in August 2012. For Maya 2012, the company released a 64-bit version, but stated that they would not be upgrading other versions to 64-bit versions. This has led to some frustration among users. On the "bureaucratic" side, because of the language of the EULA, attempting to port Maya 2012 to 64-bit systems may be considered a "distribution without authorization." As such, it is still not legal for Maya 2012 to run in 64-bit on systems not explicitly authorized by Autodesk.
