When opening a file it opens and shows the syntax markdown as I want but when saving the file, it saves as the local default encoding (e.g. UTF-8) and not the current language encoding. How can I configure VIM to automatically recognize the current language encoding and set the file encoding to the current language? A: set encoding=auto or set fileencoding=utf8 In case you want to set encoding for the entire session set fileencoding=utf8 A: This helps me to change encoding of the VIM (I'm using japanese) :set fileencoding=iso-2022-jp :set fileencoding=utf-8 :set fileencoding=utf-8 but :set fileencoding=utf-8 does not works. Tuesday, February 10, 2010 Mid-Lifers We are all expected to be mid-lifers in our 20's and 30's. We reach our peak earning years between the ages of 35 to 50. Unfortunately, life doesn't always work out like we think it should. If you are 30 years old and still a young teacher, you are probably regarded as a mid-lifer. Are you just in the wrong place at the wrong time? Are you suffering from the mid-lifer blues? I came to the conclusion that I was mid-lifer a few years ago. I was 38 and had been teaching for a little over 5 years. I loved my job, but I just didn't feel like I was doing anything very important with my life. My family was growing and I didn't feel like I was contributing to anything other than being a full-time mom. I started to feel the mid-lifer blues creeping in. I got a little depressed 77a5ca646e
