The new ArcGIS 10.1 beta has the new and enhanced features listed below. See the Release Notes to find out the features. For information on how

Q: How to use REGEXP with - regexp In my javascript I need to remove email or domain from email field, which have comma separated multiple email id's Here are the regexp which i am using, `search.replace(/[\s\\(\|\)\|\\+|,]+/g, '')`; It is working fine, for the following email field `test@gmail.com,test@gmail.com,(5,7)` However if i change the regexp, it will not work `search.replace(/[\s\\(\|\)\|\\+|,]+/g, ',')`; It is not working, for the following email field `test@gmail.com, test@gmail.com test@gmail.com` I tried checking the code, it is taking spaces and parenthesis as well, how can i make it to take only comma as separator. Here is my c# code `List e_emails = new List(); //var html = "test@gmail.com, test@gmail.com test@gmail.com, (5,7), test@gmail.com, test@gmail.com test@gmail.com"; e_emails = HttpUtility.HtmlDecode(html).Split(','); foreach (var e_email in e_emails) { var emailRegex = @"(^([a-z0-9.!#$%&'*/+=?^_`{|}~-]+@[a-z0-9](?:[a-z0-9]*[a-z0-9])?(?:\.[a-z0-9](?:[a-z0-9]*[a-z0-9])?)*)"`; string editemail = `Regex.Replace(Regex.Replace(e_email, emailRegex, string.Empty), emailRegex, "", RegexOptions.IgnoreCase); e_emails.Add(editemail); Console.WriteLine(e_emails); }` A: The first [in your emailRegex is actually consuming 82138339de
