A comparison of the demands of the American College of Occupational and Environmental Medicine and the American College of Sports Medicine. To evaluate the differences in demand on the time and energy of Fellows in the American College of Occupational and Environmental Medicine (ACOEM) and the American College of Sports Medicine (ACSM). A questionnaire was sent to Fellows of ACOEM and ACSM. The questions were generated by a Delphi technique, which used content experts as well as members of the societies to identify those questions that were most important for a close-to-perfect competency in the respective societies. An analysis compared the differences in demands on the time and energy of the members. The amounts of time ACOEM Fellows spent on different activities in the last year were significantly different, but the time spent on the activities was not. When the two groups were compared, the ACOEM Fellows spent more time on written work, less on scientific writing, travel, other professional activities, communications and meetings, and less on communication, meetings, and scientific writing. The ACSM Fellows spent more time on scientific writing, less on meetings, and the same amount of time on the other activities. The salaries of both groups were equal. The most obvious difference between the two societies was in the amount of time and energy spent on various types of activities. The activities that differed most in these two societies were written work, scientific writing, meetings, and communications. In service of “the Law of the Land” “You know how when you do a demo and it’s difficult, the whole performance is about that, everything.” When you’ve been doing material for a while, it’s a good thing if a live audience relates to your stuff. That’s what happened with Oreck’s live performance of “So Much More Than I’d Ever Dreamed” and “Thought About You.” Last month, Oreck released its first collection of demos — called “Today I’m Living in a Dream” — to satisfy fans and give them a taste of what’s to come. This is a real thing. Fans have been sitting in stunned silence, holding their breath, waiting for the release of these brilliant demos. This is the stuff that got them excited about Oreck in the first place. It all started with this kind of material. "I◆
