Downverter is a software application built specifically for helping you download videos from YouTube and save them on the computer for offline viewing, as well as extract the audio streams. The layout is intuitive enough to be configured without having to consult a help manual or watch online tutorials. The program gives you the possibility to paste the desired URL from YouTube directly into the primary panel. Downverter offers support for a wide range of video and audio formats, such as MP3, MP4, WMW, AVI, ACC, FLV, MKV, 3GP, and others, and you can easily select the desired one from a drop-down list. What's more, you are allowed to choose the saving directory, export the current file to your iTunes library, alter the volume, as well as enter the filename. One of the best features bundled in this tool is the "One-click download mode" which enables you to automatically start the downloading process when the URL is pasted into the main window of the program. You only need to set the preferred output format, saving directory, and other parameters, and the tool carries out the downloading task based on your previously-specified settings. Other notable characteristics worth mentioning are represented by the possibility to make the utility remain on top of other apps, turn off the computer at the end of the downloading task, limit the downloading speed, and set up proxy parameters. To sum things up, Downverter makes the downloading process seem nothing but a child's play. Thanks to its intuitive layout and rich set of output formats, the tool may become ideal for beginners and professionals alike.
