At this point, the updater will prompt you to select a color on your keyboard. If you have selected an orange keyboard color and the updater prompts you to select a different color, please update to the new version by choosing the color you want: If you have never changed the keyboard color, follow this link to learn how to change the keyboard color in Bassbox Pro. **AFTER DOWNLOADING, INSTALLING THE INFLOW SERVICE SETTINGS WILL UPDATE AGAIN!!!** To change the color from **ORANGE** to **RED**, press **HOLD** on the keyboard and select a new color. When the program is updated, you will see a complete list of settings. Figure 8 shows an

example of setting the color "CRYSTAL MULTICOLOR" on the keyboard color you have chosen. If you have any idea how to improve the sound quality, there are two ways: 1. Decrease the sound depth:

- Decrease the tone or turn down the sound volume.
- Eliminate extraneous noise. Unfortunately, this is the first of these two paths - this is the one I recommend to use, because it is the fastest.
- Increase the frequency of the sound.

2. In some cases, you cannot choose one of these paths. In this case, if you have a high sense of balance, you can achieve an impressive sound by doing the following: 1) Increase the number of frequency bands you want to process. 2) Increase the strength of the frequency tone. 3) Turn down the volume. As you can see in Figure 8, this article will help you. Now, for better orientation, let's look at all three paths in more detail. 1) Embrace the Night Scene: Deepen Your Sound - Delete
