Myocardial ischemia is a major cause of coronary artery disease and cardiac failure. The majority of patients with heart disease, even myocardial infarction, do not receive appropriate therapies due to non-invasive lack of evidence. In patients with recurrent episodes of ischemia, mechanical defibrillation with transvenous cardioverter-defibrillator implantation has been used as a "therapeutic" device for a decade. The rate of improvement in function and time to death is similar to that 570a42141b
