A case of dowry harassment was registered at the Namajipura police station. The victim's family alleged that the accused used to throw stones at their house, and the woman was pressurised to get married. The family members of the victim alleged that the police took more than three hours to register the complaint. The victim's sister said that the family had previously informed the police but they did not take any action. However, they informed the police only when the accused began to throw stones at their house, she said. The investigating officer refused to give any information and said that the case is under investigation, she added. Q: How to prove that they are geometric sequences? I have a number of different questions on how to prove that something is a geometrically increasing sequence. I think they are all similar, so I will start with the first. Question: $a_1=17$ and $a_{n+1}=\frac{1}{3} a_n$. Find a_n . A: The recurrence relation becomes $a_{n+1} = \frac{1}{3} a_n$ Using that $\frac{a_{n+1}}{a_n}=\frac{1}{3}$ Substituting a_n in a_{n+1} for an arbitrary a_n we get $a_{n+1}=\left(\frac{1}{3}\right)$
