- ... Box VoIP is a software audio communication system capable of VoIP telephony over the Internet. It is an easy to use multi-platform solution that will help you and your friends to communicate with ease. It can connect through an ordinary computer with either a sound card or a built-in microphone and/or an Internet connection and a headset. It is also capable of being used as a normal telephone (contrary to most VoIP software which are solely telephone applications). If it is your intention to use Box VoIP as a way to replace traditional telephone service, you are going to need to either have an active telephone line for incoming calls or plan to have a normal phone installed on your computer so you will be able to make outbound calls from it.
- ... Color Text To Speech Converter is an all-in-one voice to text and text to speech applications. It can convert your text notes into colorful audio files or into WAV or MP3 audio files for listening. If you are a fan of listening to text files, you can have the pleasure of listening to those notes on your portable devices such as iPods, PocketPCs and CD players etc., the built-in microphone is pretty good too.
