Tic-Tac-SightWords X64 [Latest 2022]

Tic-Tac-SightWords is an educational application that enables you to learn or to teach word spelling and pronunciation with the help of a Tic-Tac-Toe game. The software combines learning sight words with the strategy in the grid game, while offering a pleasant and effective educational tool. Play Tic-Tac-Toe, learn sight words Sight words are those pieces of text that young readers and not only, are encouraged to memorize using their visual senses. A word that is memorized in this way can be recognized within a large text at a very quick, first sight. This way, a reader can determine what the text is about before even reading it. Additionally, you can easily use it as a learning tool for children and teach them how to read. The game is simple: the software pronounces the word and you need to identify the correct spelling on the Tic-Tac-Toe grid. If you clicked the correct answer, the word turns into an X. The software automatically turns one of the incorrect answers into a 0. Three Xs in a row, column or diagonally means you win the round. Configure the word lists and game levels A game level requires a list of at least 5 words in order to be enabled. The software allows you to configure up to nine levels, each with customizable entries. Thus, you can enter any word you wish, with the additional phonetic pronunciation. The text-to-speech built-in function allows the software to be able to turn the graphic representation into a spoken word. You can choose between the available voice templates from Windows: David, Hazel and Zira. Moreover, you can easily import or export sight words from/to special Tic-Tac-SightWords (TTS) format. Reliable learning tool Whether you wish to teach children how to read or to teach yourself how to recognize sight words, Tic-Tac-SightWords can help you by providing an interactive educational environment. The software features a resizable interface, which can make the words look larger or smaller, depending on which methods allows you to visually memorize them faster. Tic-Tac-SightWords Description: PCWorld Rating: Tic-Tac-SightWords is an educational application that enables you to learn or to teach word spelling and pronunciation with the help of a Tic

Tic-Tac-SightWords

KeyMacro helps you remember the keyboard shortcuts you use most often. It runs in the system tray and silently registers the shortcuts you use. It will remind you every time you launch an application or any other program that uses them. Built in Macro Manager: You have the option of creating your own macros in the Macro Manager. It features a fully editable simple text format and allows you to configure any key combination, including keyboard shortcuts, to be registered as a macro. To register a macro, simply specify the key combination and the command it should execute in the editor. You can use multiple macros for your favorite applications. For example, if you use the special key combination Ctrl-A, you can use two macros: one to call Google Chrome and the other to open the New Tab page. Scheduled macros: You can schedule the execution of your macros at a specific time or on specific day. You can also specify whether you want the macro to execute once or repeat the macro as many times as needed. Online help: You can get help directly from the program's interface by pressing F1. Syntax highlighting: KeyMacro works with any modern text editor. It is compatible with all popular text editors like: Notepad++, WordPad, Notepad, Sublime Text, etc. Award-winning software: KeyMacro is an award-winning application and is widely used in schools, universities and many other organizations. It has been featured in hundreds of articles and websites. Troubleshooting: KeyMacro works fine. It doesn't display an error message if you press the wrong key combination. What's new in this version: Added support for Visual Studio 2019 Release Notes: v2.0.1.1: - Worked around an issue where there is a delay when launching an application that includes a shortcut key. v2.0.1: - Added a scheduled macro support. - Added the right Shift key to the backspaces list, to make it more consistent with Microsoft Windows. - Added a user-defined shortcut to open the Macros Window. - Added a system tray icon to the Macros Window. - Added the possibility to configure the size of the text and lines in the Macros window. - Added a filter to the Macros window. - Added an online help. - Added the possibility to auto-correct the shortcuts if there are words missing. 1a22cd4221
