## **Meal Menu Database Crack + Serial Number Full Torrent Download [Mac/Win]**

Name: Meal Menu Database Crack Mac Type: Windows File Size: 14.5MB License: Shareware Price: \$29.99 Version: 2.0  
Operating System: Win32 Easy to Use and Easy to Create Menus and Ingredients and Meals! Menu Database is a handy utility that can create, edit and maintain dinner menus and make your life much easier when it comes to meal planning. As the name suggests, the program is able to prepare and generate dozens of menus as well as to produce the detailed ingredient list and ingredient amounts for each dish. This tool is very flexible as it allows users to design a custom list of menus and ingredients and then create the necessary amounts in the selected units. You can use Menu Database to create: \* Dinner menus - Any number of menus per day. \* Ingredients list for a specific dish - Any number of recipes per day. \* Ingredient amounts for a certain number of people - Any number of meals per day. Besides, the utility allows you to edit any recipe, ingredient or meals to any time interval. This makes it very easy to create customized menus, ingredients and recipes with a single click. You can create your meals based on a specific recipe, for instance, or on any ingredient or meal you want, so there's no need to put in a lot of effort and time trying to come up with new menus. In addition, the application supports a range of popular food units, such as tbs, cups, lbs, ounces, etc. so that you can adjust the amounts of any ingredient to the most suitable unit for your purposes. The program is built on top of the Microsoft Access database engine so it can be used for a variety of tasks including creating, editing, maintaining, and comparing any number of menus and ingredients. Here are some of the most interesting features included in the Menu Database software: \* Create and manage a variety of meal menus \* Create an ingredient list for each menu \* Prepare and maintain the ingredient amounts for each menu \* Specify a meal amount per day and create a list of meals based on a recipe \* Generate a variety of menus and ingredient lists for any time interval \* Edit any menu or ingredient in just a few clicks \* Generate customized menus and ingredients to suit your preferences \* Use the utility to edit existing meals or ingredients

## Meal Menu Database Free License Key

A Meal Menu Database is a very useful tool that can help users create a diverse list of dishes in several types that are simple and easy to prepare. The free version of the application includes 5 meal categories, ingredients, recipes and dishes. You can also add new dishes in this free version as well as remove them and re-edit them. You can create dishes based on pre-defined recipe categories, such as Thai, Italian, Mexican, Asian, and so on. While adding a new dish, you will be required to select the recipe category as well as the ingredients required. To add a recipe, you will have to first click Add New Recipe and then select the recipe category and sub-categories. You will then be able to enter the recipe details and quantities. Once you are finished entering the ingredients and quantities, you can add the dishes. You will first click Add Recipe and then select the dish. You can then change the ingredients and quantities or even delete a dish by simply clicking on it and then delete. To see the ingredients and quantities of a dish, you will simply click it and the number will appear next to the dish. To see all the ingredients and quantities of a dish, you will click it once and then click another dish or ingredient to view all the dishes ingredients. To add a new dish, you will click Add New Recipe and then select the dish category and sub-categories. After you are finished adding your dishes, you can create a new menu for a day. You will first click Menu and then click the day you want. This will open a window where you can enter all the details including the menu name, ingredients, and the number of servings you want for that meal. You can then click Add New Menu and then select the recipe category and sub-categories. You will then be required to enter all the details and then click Add. Once you are finished adding all your menus, you can then click the checkboxes to select the ones you want to create. The free version of this application can come in handy for anyone who want to create a complete list of menus for a particular time period, such as a week or a month. In addition, you will be able to change the ingredients units and the units shown in ingredients, dishes and even the whole interface. To change the ingredients units and units shown, you will have to click on the Ingredients and Dishes interfaces and then click the button that says Ingredients. You will be required to select the unit you want to use.

## What's New in the Meal Menu Database?

Meal Menu Database is a lightweight utility that can come in handy for anyone struggling with ideas for meal preparations. To put it simply, the application has the role of generating menus as well as a complete list of ingredients and the necessary amounts for them. On a side note, the tool requires you have Microsoft Access installed on your system. The menus are quite customizable and can be generated for any time interval. In addition, users can specify the number of meals they want to have per day as well as the number of servings. The ingredients required to prepare the dishes come are displayed in specific units, such as tbs or cups, for instance and the amounts shown are for a single person. The utility can also be described as a comprehensive database where users can access dozens of dishes and menus suitable for most tastes and preferences. Users can delete and edit any of the ingredients and dishes in this database without too much hassle. At the same time, users can change the ingredients units, then they should learn that the tool also updates the Ingredients-Dishes interface to allow the amounts to be easily compared and therefore, adjusted for each dish.
