Quickly edit your keyboard shortcuts. iKey is a simple, fast, and powerful hotkey manager. You can use it to assign a hotkey to any command or any process, as well as to display the hotkey for any shortcut. For example, you can assign a hotkey to show any dialog box on the screen. Key macros can be in two types of keys: hotkeys and shortcuts. Hotkeys are assigned at the application level, and help you speed up repetitive tasks, like web browsing, system start-up, and more. Hotkeys are not dependent on your system state. For example, if you have the iKey program installed on your desktop computer, you can still use hotkeys on your laptop, and vice versa. Key shortcuts are used to assign a single hotkey to any task, like one-click launching of a PDF file. Key shortcuts are system-dependent, and not valid on another system. You can use iKey to launch your web browser, then open a PDF file right from the browser's address bar without opening a separate program. Highlights Highlights: - You can run multiple instances of the same program at once. You can use this feature to launch many web browsers at once, such as Firefox, Chrome, and Internet Explorer. - iKey integrates with Windows taskbar. You can assign hotkeys to the program icon in the Windows taskbar. - Drag and drop your key macros into iKey. A key can be dragged from one program to another, and vice versa. You can drag it from your browser's address bar, or from a text editor. - iKey is for both Windows and Mac OS

X users. - You can use one hotkey to launch different programs, such as launching different web browsers. - iKey also works on mobile devices. - iKey works with most major web browsers. How to install iKey: - Open the iKey application and click the "Install" button. - Choose "Click to Install" if the message "Do you really want to install this app" pops up. - Select the location to install the application on your computer. Click Next. - Enter the required information to create a user name and password for your account. Click Create. - Click the "Finish" button. How to use iKey: - Launch the iKey program. - The iKey program will display its interface, including its main window. 1a22cd4221
