[on IMDb] Category: Cinema of India Category: Women in Hindi cinema Category:Indian drama films Category:Indian films Category:2010s Hindi-language films Category:2010s drama filmsQ: How to create a model for this product in AVAudioPlayer? I try to create a simple app for reading an MP3 song, this app has three components: Plist with two UIButton that plays and stop an audio file AVPlayer view for reading the song, the song data is received as a plist in a NSMutableArray An AVAudioPlayer view to play a sound when the user click on the UIButton to play or stop the song. You can download the app here: I make use of Swift 3 and the Segue delegate to transfer data between view controller. This is my AppDelegate: import UIKit import AVFoundation @UIApplicationMain class AppDelegate: UIResponder, UIApplicationDelegate { var window: UIWindow? func application(_ application: UIApplication, didFinishLaunchingWithOptions launchOptions: [UIApplicationLaunchOptionsKey: Any]?) -> Bool { // Override point for customization after application launch. return true } func applicationWillResignActive(_ application: UIApplication) { // Sent when the application is about to move from active to inactive state. This can occur for certain types of temporary interruptions (such as an incoming phone call or SMS message) or when the user quits the application and it begins the transition to the background state. // Use this method to pause ongoing tasks, disable timers, and throttle down OpenGL ES frame rates. Games should use this method to pause the game. } 570a42141b
