What's New In?

A tool that allows you to create, store and print monthly records of employees' salaries. The tool works as an Excel macro and allows you to work in a familiar environment, by managing spreadsheets. Detailed description XLTOOL - Salary Slip Printing & eMail Software is a Microsoft Excel tool that enables you to create, store and print monthly records of employees' salaries. The tool works as an Excel macro and allows you to work in a familiar environment, by managing spreadsheets. The benefits of databases: Easier to manage New entries added to the database are stored in the database file Database can be updated at any time Allows easier search, organization, and analysis of data Can be used in reports What our customers say The tools are pretty decent, but they are just like the demo's you get when you buy a software. I am a beginner to Excel. I never use the demo tools because they don't really give me the ability to create my own Excel files. I do have experience with Access and Visual Basic, but my computer crashed and I lost my computer so I have to learn everything over again. I don't really have time to do that. You should really have the demo tool where you can use the software and teach yourself. Beware of scams by unknown people who call you and ask you to send them money. Never send them money. Read our reviews before you try to sell your product on this site. A software developer who started programming on Visual Basic for Applications and liked it. I discovered the power of macros and now I am hooked. I really love the idea that a macro can store programs in a database and I can use the macros to update the database and to automate certain tasks. Since I started using Excel I always find myself longing for an easier way to create reports and automate repetitive tasks. As a teacher I needed some way to use Excel to create reports and access my database without having to open every document and copy formulas and data in and out of Excel. XLTOOL - Salary Slip Printing & eMail Software really hit the mark. The developer has spent hours and hours understanding the market and creating a tool that really makes working with Excel so much easier and faster. I have used a lot of software that I have found to be too complicated and hard to use. I use Excel everyday and I spend a lot of time working on my database. I tried a lot of other software and found that it was very complicated and hard to use. XLTOOL was easy to use and created a lot of the features that I wanted. I need to make a lot of
