Password Helper is a powerful Windows tool for generating secure passwords. It does not require installation and allows you to create secure passwords fast and easily for your email, social networks and more. User Reviews I need to generate secure passwords for my email, social networks and PC (encrypt my data) and I was searching for a good and portable app that had a simple interface. Then I found Password Helper. And I

really liked it! I thought it'd be great for someone who was concerned with security but didn't want to pay too much, so I decided to give the paid version a try and see if it was worth the \$9.95 I was charged. Well, it wasn't. After I purchased the app I found out it doesn't allow you to generate passwords longer than 13 characters (it's limited by Windows) and, in my opinion, Password Helper is not worth the money. I think I'll just keep using LastPass. What it does do is just a very simple way to easily generate passwords. And all I can say is, I love it. I tried the free version for a month and it 6a5afdab4c
