MuWire is a piece of software that lets you share music files with friends and family in a fast and easy fashion. The program's interface is highly intuitive and therefore, easy to work with it, no matter how inexperienced the user is. In the main screen, the app displays all the music files from a previously chosen folder. These can be sorted according to the name of the song, artist, album or type of file. The tool integrates a search tool that enables users to look for certain items within the network by inputting the artist, album, song or genre. The fact that there is no limit to the number of simultaneous searches you can perform makes MuWire highly efficient, and helps you quickly find all the songs you are interested in. The program also incorporates a media player, so that you can listen to all your favorite music while downloading or uploading it. The application has a built-in blacklist that you can add an unlimited number of IP addresses to, so that you can be protected from harmful clients or other types of nuisances. You should also know that MuWire enables users to easily link the program with their Twitter account. This makes really easy to share downloads paired with a custom message, such as "Just downloaded X with @MuWire". All in all, MuWire is a very helpful tool that you can use to share music with friends and family. The search tool, built-in blacklist and media player are features that make this program efficient and reliable.
