

LANShare is a simple, lightweight, portable, and secure proxy server for LAN/WAN sharing. LANShare provides you all-in-one functionality that enables you to share the Internet connection between multiple computers and mobile devices on LAN, WAN, or the Internet. Features: -Simple but powerful -Fast, highly scalable -Low resource requirements -Extremely easy to use -Secure tunneling -Easy installation -Support proxy, cache, and router configuration -Support HTTP/HTTPS/FTP/RTP/RTSP tunneling -Support proxy authentication -Support remote control and monitoring through console -Support LAN/WAN/Internet access sharing -Monitor bandwidth usage -Support proxy and cache Multilingual Multi-file-extension ZIP-Archive-Viewer is a tool to view ZIP and 7z archives. The program shows all files in a ZIP-archive or all files in a directory of a 7z archive, in a separate window for each file. Features: \* Multi-language interface (German, English, French, Italian, Japanese, Dutch, Polish,...) \* View files of a ZIP archive or all files of a directory of a 7z archive, in a separate window for each file. \* File info: details of files, size, date and time, size of a directory, date and time of archive creation, size of an archive \* User-settable icons and text files \* Customizable label of file-columns \* Allows to view the contents of a 7z or ZIP archive right-clicking on a folder in the program's window. The program allows to open all files of a 7z or ZIP archive by double-clicking a folder in the program's window. Multi-language Multi-file-extension ZIP-Archive-Viewer is a tool to view ZIP and 7z archives. The program shows all files in a ZIP-archive or all files in a directory of a 7z archive, in a separate window for each file. Multi-language Multi-file-extension ZIP-Archive-Viewer is a tool to view ZIP and 7z archives. The program shows all files in a ZIP-archive or all files in a directory of a 7z archive, in a separate window for each file. Emby Play allows you to watch TV on your computer, tablet or smartphone from your network or other media

What's New in the?

LANShare is a small, simple, easy to use application specially designed to offer you a proxy server implemented in C#.NET. It supports many popular web servers, including IIS, IIS Express, Apache, GlassFish Server, Tomcat and more. I also added a powerful management interface, and SSL/TLS tunneling, if you need this feature. LANShare is so small, but powerful, that you can run it as a service under Windows and as a GUI application under Linux and Solaris. There are multiple ways to control LANShare. You can start it with the management console or as a service, send HTTP requests through LANShare or even access the management console remotely through a web browser. The server supports many popular authentication methods: basic, digest, NTLM, Kerberos and more. ... It supports many popular web servers, including IIS, IIS Express, Apache, GlassFish Server, Tomcat and more. I also added a powerful management interface, and SSL/TLS tunneling, if you need this feature. LANShare is so small, but powerful, that you can run it as a service under Windows and as a GUI application under Linux and Solaris. There are multiple ways to control LANShare. You can start it with the management console or as a service, send HTTP requests through LANShare or even access the management console remotely through a web browser. The server supports many popular authentication methods: basic, digest, NTLM, Kerberos and more. Related Software Tomcat is a free and open source implementation of the Java Servlet and JavaServer Pages technologies. Tomcat is a component of the Open Source Tomcat project, and is a free, community supported alternative to Internet Information Services (IIS) and other proprietary servlet and JSP containers. Tomcat 5.5: Transport Layer Security (TLS) 1.1 (JAR with TLS 1.2) - T-Lab TLS 1.1 is a security protocol designed to protect communications from eavesdroppers or modification. As TLS 1.2 has not been standardized yet, TLS 1.1 is still in use. TLS 1.1 is part of the Transport Layer Security (TLS) protocol suite. TLS 1.2 is the successor to TLS 1.1. For more details about TLS 1.1 please refer to HTTP Strict Transport Security - Open Source Software HTTPS is the protocol of a secure web connection using SSL and HTTP that provides authentication, confidentiality, and message integrity. Many websites that support HTTPS use HTTPS only

**System Requirements:**

Important! Use the ATI or Nvidia control panel to modify your system performance and increase your system stability. Adobe Flash Player is an essential component for the use of this application. Click here to download the latest version of Flash.
