content management system that allows users to build their own websites and web applications. In order for MediaWiki to generate web pages, it needs to store objects in an internal data format that can be read and written by a PHP script. Unfortunately, MediaWiki cannot write objects that were created by other PHP scripts. Objects can be created using XML data. This is a standard web-page format that can be easily converted to MediaWiki objects. \*Automatically converges original MBX files to Outlook, Windows Mail, Windows Live Mail, Thunderbird, Entourage or the native Mail app on OS X. \*Easy-to-use and works in seconds. \*No file conversion needed. SoftSpire Eudora Converter Screenshots: SoftSpire Eudora Converter Full Review: Eudora is being less and less used on the desktop. The email program began a transition towards using webmail but, as always, some users still need a desktop solution. This is where SoftSpire Eudora Converter comes in handy. To speed up the

---

conversion of your emails from Eudora to a format supported by other email clients, a cross-platform software solution comes in handy. SoftSpire Eudora Converter converts your original MBX files to EML, EMLX or PST. It also enables you to convert the original MBX folders to EMLX. And of course, the solution comes with a user-friendly and intuitive interface. Eudora is a cross-platform program for sending, reading and organizing email, developed by Seattle-based Neutral Software. It became one of the first open-source email clients. It was initially only available on Microsoft

---

Windows operating systems, but soon the developer started working on a port on the Mac operating system. SoftSpire Eudora Converter is a standalone program for converting Eudora emails to Outlook, Windows Live Mail, Microsoft Windows Mail, Mozilla Thunderbird, Entourage, the native Mail app on OS X and iTunes Mail. So, if your email client is not supporting the Eudora format, SoftSpire Eudora Converter can save you some time and effort. SoftSpire Eudora Converter main features: With Eudora email, you can send and receive files to and from your friends using the email

client, similar to the way that you could send and receive documents with MS Word. When you create an email message, Eudora asks you what kind of document or attachment you are sending. It's a helpful feature. But, in Windows 2000 and earlier versions, you had no way of converting these files to different file formats. You could only access your email messages on the web, which meant you had to wait for your emails to arrive on your PC before you could view them. SoftSpire Eudora Converter uses
